Solutions and
technology
watch

Redeia is the global manager of essential infrastructures.

A driver of the energy transition and universal connectivity.

Operates the Spanish electricity system and manages electricity and telecommunications networks (fibre optics and satellites), with a focus on innovation and sustainability.

Redeia's international presence

- ✕ Apart from Spain, Peru, Chile, Brazil and Colombia, Redeia is present in: Mexico, Germany, Ecuador, Great Britain, Greece, Argentina, South Africa, Luxembourg, Senegal, Belgium and United States.
- Satellite coverage area.

red eléctrica

Backbone of the energy transition and guarantee of a secure, quality and increasingly renewable electricity supply.

reintel

Largest provider of dark fibre in Spain, essential for offering widespread connectivity.

hispasat

Leading player in the digital transformation and the reduction of the digital divide in Spain and Latin America.

redinter

Driving force behind the de-carbonisation of the energy model and sustainable development in Latin America.

elewit

Technology innovation platform fostering the energy transition and connectivity.

We are Redeia's technology platform

We were founded in 2019 to offer solutions to the new challenges in the electricity and telecommunications sectors.

Our goal is: to promote the energy transition and connectivity to create a sustainable future.
