2. Evolution of results

Turnover for 2009 amounts to €1,200.1 million and the 6.6% increase has largely been due to the rise in the remunerated asset base owing to the facilities started up in 2008 and the effect of the 0.2% price restatement, following the discounting of the efficiency factor.

EBITDA amounts to €845.6 million, representing growth of 9.6% compared with 2008, as a result of the containment of operating expenses:

- **Supply costs and other operating costs** fell by 2.5% compared with the previous year. Not including the costs of claims that are recovered through insurance policies and non-recurring provisions established in the previous year, supplies and other operating expenses have increased by 2.4% owing to the increase in the asset base.
- **Staff costs** increased by 11.0% in 2009, while the average number of employees has increased by 7.9% in the same period. During 2008 final quarter some provisions were regularised, which led to abnormally low expense during the aforementioned quarter.

The **average number of employees** of the Red Eléctrica Group at 31 December 2009 stands at 1,641 people. Moreover, the **final number of employees** stands at 1,679 people, up 5.3% compared with 2008.

Operating expenses

(in thousands of euros)	January - December			October - December		
	2009	2008	Δ %	2009	2008	Δ %
Supply cost and other operating expenses*	268,934	262,539	2.4	67,946	76,940	(11.7)
Staff costs	104,236	93,927	11.0	27,739	20,398	36.0
Operating expenses	373,170	356,466	4.7	95,685	97,338	(1.7)

*Excluding claims costs that are recovered through insurance policies and the non-recurring impact of €11 million in respect of the provision reflected in 2008.

EBIT increased by 3.9% compared with 2008, as a result of amortisation/ depreciation for the year, which rose by 3.7% largely due to the start-up of transmission assets and a provision for **asset impairment** amounting to €45.1 million, based on the valuation carried out of the value of the Group's international investments.

Financial results amounted to € -84.5 million compared with €-110.1 million in 2008. Financial income amounted to €6.5 million and includes €4.4 million relating to the dividend paid out by REN in the second quarter. Financial expenses net of capitalised amounts amounted to €91.2 million compared with €117.2 million in the previous year, largely as a result of the fall in interest rates.

Lastly, **Profit for the year** was up 15.5% compared with 2008. The effective tax rate stood at 28.3% compared with 31.1% in the previous year. The effective rate was affected by the favourable resolution of the Treasury and Tax Court relating to the Deduction for Export Activities amounting to €3.3 million.

* The difference with the variation in the Net financial debt of page 2 relates to items entailing no movement in cash.

Operating cash flow after tax amounts to €616.1 million, up 12.9% on 2008, largely attributable to the increase in profit after tax obtained in the period. The movement in other adjustments is mainly attributable to the provision for asset impairment.

Changes in working capital and other long-term assets and liabilities, amounting to €121.0 million, mainly includes the positive impact of the recovery of €49 million related to 2008 VAT.

Investments carried out by the Group in 2009 amounted to €758.6 million, up 19.4% on 2008. Investments for the year largely relate to the development of the national grid and have amounted to €734.8 million. During 2009 a record number of 223 substation positions were brought into service, transformer capacity having been increased by 3.400 MVA. Similarly, 431 km of lines were brought into operation.

Dividends paid at 31 December 2009 amount to €172.2 million and are 17.2% up on the pay-out in 2008.

The cash flow generated during the year, together with the positive working capital and other long term assets and liabilities evolution, have been sufficient to finance the new investments and the dividend payment, incurring in an increase of the net financial debt of €193.7 million

The Red Eléctrica Group's **Net financial debt** at 31 December 2009 amounts to €3,122.2 million.

Net financial debt

(in thousands of euros)	National currency	Foreign currency	Total
Cash and cash equivalents	(7,134)	(6,934)	(14,068)

Total net financial debt	3,076,379	45,828	3,122,207

On the basis of interest rates, 76% of the Group's net debt is at a fixed rate while the remaining 24% is at variable rate.

Additionally, in 2009 the average cost of the Group's financial debt stood at 3.49%, while its average balance amounted to €3,153.3 million. In 2008 the average cost of the debt stood at 4.39% while the average balance amounted to €2,911.1 million.

At 31 December 2009 the Red Eléctrica Group's equity amounted to €1,439.2 million up by 7.7% on 2008. This increase results from the profit for the period, partly offset by the valuation of hedging derivatives, the pay-out of 2008 profits and the 2009 interim dividend.

4. Relevant events during the period

- **Interim dividend:** On 17 December 2009 the payment of an interim dividend against 2009 profits was announced amounting to 0.5115 Euro per share, representing an increase of 14% compared with the previous year. This dividend was paid on 4 January 2010.
